CE COURSE REGISTRATION
Thyroid Testing and Dosing:
A Functional Approach to Assessment and Treatment of Hypothyroidism
Presented by Jim Paoletti, RPh
Director of Provider Education at ZRT Labs
Co-sponsored by ZRT Labs and Pacific Compounds Pharmacy

Tuesday, March 30th, 2010
5:30pm to 8:45pm (2.5 hours CME/CE/CPE credit)
Ernesto's Italian Restaurant
8544 SW Apple Way, Portland, OR 97225

The program is designed to provide practitioners with an understanding of the underlying causes of thyroid symptomology and subclinical hypothyroidism, and includes a useful clinical tool to determine where physiologic and pharmacological problems may be occurring. Topics will include:

- * Production, metabolism, binding and receptor function for thyroid hormones
- * Understanding the limitations in use and interpretation of standard thyroid testing
- * Using standard thyroid testing to differentiate hypothyroidism, functional hypothyroidism, and functional hypometabolism
- * Treatment considerations for low thyroid hormone production, poor metabolism, excessive hormone binding, and poor thyroid receptor function

To Register: fax this form to 503-640-3208, or call Cory at 503-640-3080
